Solutions

- **Upgrade to D365 F&SCM:** Implemented a centralized system that integrates seamlessly with existing processes, allowing for real-time data access.
- **Power Platform Implementation:** Enhanced automation and streamlined operations across various functions, reducing manual tasks and improving operational efficiency.
- **Azure Integration:** Seamless integration with Azure services for improved cloud compatibility and data management.
- **Custom App Development:** A tailored solution was developed to address specific expense management challenges.

Services

- AX upgrade to Dynamics 365 F&SCM
- Power Platform
- Azure
- Microsoft Fabric
- Manufacturing Accelerator

Benefits

- Streamlined transaction handling and inventory tracking reduced the time-to-execution process from 15 days to just 1 day.
- Enhanced supply chain management facilitated effortless access to files and emails, smoother handovers between teams, and remote system accessibility from any device across locations.
- Secured data management and greater flexibility for remote access across multiple devices.
