# Manufacturing Accelerator

Automate Reservations. Enhance Efficiency. Improve Customer Satisfaction!

DynaTech Systems' Manufacturing Accelerator eliminates the challenges of manual reservation processes. By automating reservations, businesses can achieve faster, more accurate order fulfillment and optimize inventory management.

### **Key Features**

#### **Customer and Order Priority**

**Feature:** Automatically categorize customers and prioritize orders for shipments when inventory is limited.

**Benefit:** Ensure that high-priority customers and orders are fulfilled first, improving customer satisfaction and ensuring timely deliveries.

#### **Inventory Rules**

**Feature:** Define criteria for reservations, such as meeting quality standards and using FEFO (First Expiry, First Out) or FIFO (First In, First Out) principles.

**Benefit:** Optimize inventory usage by prioritizing fresh stock and avoiding near-expiration or expired inventory, ensuring quality and compliance.

#### **Reservation Logs**

**Feature:** Access detailed logs of reservations, including orders picked, successfully reserved, and those unreserved due to inventory shortages.

**Benefit:** Gain transparency into the reservation process, identify bottlenecks, and ensure proactive management of inventory.

#### **Customer-Specific Rules**

**Feature:** Customize reservation rules for individual customers, including allowing/disallowing partial deliveries or accepting different material batches.

**Benefit:** Tailor the shipping process to meet specific customer needs, increasing flexibility and service quality.

#### Automatic Batch Jobs

**Feature:** Schedule automated reservation batch jobs at set intervals using predefined rules in Dynamics 365.

**Benefit:** Eliminate manual reservations, reduce errors, and improve operational efficiency with scheduled, rule-based automation.

#### **Our Impact in Numbers**

#### 350+ Masterminds

- 100+ Clients Worldwide
- 150+ Dynamics 365 Projects
- 98% Client Retention Rate
