

SecureD365 for F&SCM

Transforming D365 Security and Compliance with
DynaTech

DynaTech's SecureD365 for F&SCM, powered by **Microsoft Dynamics 365 F&SCM** and **Azure Directory**, transforms your security operations by improving license management, monitoring user access, and ensuring compliance.

Key Features

License Allocation Tracking

Feature: Manage and optimize user licenses with detailed reports, recommendations, and inactive user detection.

Benefit: Ensure proper utilization of licenses, reducing unnecessary costs and improving user management efficiency.

Access Control

Feature: Detect designation conflicts, view detailed user access information, and identify cross-entity access conflicts.

Benefit: Maintain tight control over user access, ensuring that permissions align with organizational security policies.

Automation & AD Integration

Feature: Automate user management processes with Azure Directory integration, including automatic user deactivation based on inactivity.

Benefit: Save time and improve security by automating user lifecycle management, reducing the need for manual intervention.

Segregation of Duties (SOD)

Feature: Identify conflicts at both role and user levels to prevent process conflicts with SOD analysis.

Benefit: Minimize security risks and ensure compliance by avoiding conflicts between duties within your D365 system.

Audit

Feature: Track user activities with detailed logs, preconfigured SOD conflict detection, and role assignment approval records.

Benefit: Enhance compliance and accountability with comprehensive auditing capabilities, making it easier to monitor user actions.

Delegation

Feature: Suggest appropriate users for role and workflow delegation to support efficient workflow management.

Benefit: Streamline workflow management by automatically recommending suitable delegates, ensuring continuity during user absences.
