

Transforming D365 Security and compliance with DynaTech

DynaTech's powerful Security Tool is designed to streamline user permissions and license management within your Microsoft Dynamics 365 Finance and SCM. With its robust features and intuitive interface, our tool ensures:

Ensure proper allocation of roles, duties, and privileges

Monitor license usage and menu item counts across roles

Identify and rectify redundancy or excess permissions

Features

01 Track License Allocation

Efficiently manage and optimize user licenses with detailed reports, recommendations, and inactive user identification.

02 Segregation of Duties (SOD)

Prevent conflicts in business processes by identifying potential SOD conflicts at role and user levels.

03 Access Control

Ensure secure access by identifying designation conflicts, viewing user access details, and detecting cross-entity conflicts.

04 Audit

Maintain compliance with detailed logs of user activities, preconfigured SOD conflicts, and role assignment approvals.

05 Automation & AD Integration

Streamline user management with comprehensive user information and automatic deactivation based on Azure Directory activity

06 Delegation

Facilitate effective workflow management by suggesting appropriate users for role and workflow delegation.
