SecureD365 for CE

SecureD365 for CE is a comprehensive security and governance tool designed for the Power Platform, offering centralized control and streamlined management of apps, data, and development processes. With our tool, organizations can:

Centralized Security Management	Optimized Governance	Enhanced Innovation & Efficiency

Features

- **CoE Admin Command Center:** Centralized Power Platform admin center for managing security and core components.

- **DLP Impact Analysis:** Assess DLP policy risks on apps through the Power Platform admin view.

- **Power Platform Admin View:** Dashboard for tracking app ownership and user activity to ensure compliance.

- **Business Value Toolkit:** Aligns app development with business goals, quantifies app impact through a value calculator, and uses value cards to visually communicate app benefits to stakeholders.

- **Developer Compliance Center**: Ensures governance and security compliance for developers within the Power Platform.

- **Cleanup Old Objects App:** Removes outdated objects, maintaining security and governance.

- **Cleanup for Orphaned Resources:** Reassigns orphaned resources to prevent mismanagement.

- **Video Hub Components:** Manages video content effectively with nurturing components.

- **Innovation Backlog:** Allows admins to manage, submit, and prioritize new innovations in the platform.

- **ALM Accelerator for Power Platform:** Streamlines solution deployment for new makers and offers advanced tools for managing complex deployments.

- **CoE Power BI Dashboard:** Offers insights into app and flow usage across environments for governance.

- **Business Process Flows (BPFs):** Ensures governance and compliance for Power Apps, flows, custom connectors, and chatbots before deployment.
